EDUCATION

University of Information Technology - VNUHCM, Ho Chi Minh City, Vietnam 2021-2025
B.S. in Computer Science

- Graduated with an Honors Bachelor's Degree
- GPA: 3.42/4.0 (8.3/10)

SKILLS SUMMARY

Programming Languages	Python, C++, SQL, Matlab
Frameworks	PyTorch, Scikit-learn, TensorFlow, Optuna
Tools	Git, L ^A T _E X, Microsoft Office
Expertise	Statistics, Machine Learning, Optimization, Optimal Transport, Evolutionary Computation

RESEARCH EXPERIENCE

Research Student 2024-Present
Evolutionary Learning and Optimization (ELO) lab

- Supervisor: [Dr. Ngoc Hoang Luong](#).
- Research topics: Mixed-Integer Optimization, Machine Learning
- Investigated Evolution Strategies, their convergence rate, and techniques to reduce computational cost. Introduced **eMI-BBO** for solving **mixed-integer problems**
- Studied **flat minimizers** and **statistical learning** frameworks for generalization guarantees

PUBLICATIONS

Toward Efficient Mixed-Integer Black-Box Optimization via Evolution Strategies with Plateau Handling Techniques

Tuan Anh Nguyen and Ngoc Hoang Luong
Proceedings of the Genetic and Evolutionary Computation Conference (GECCO 2025).

PROJECTS

GRAVEL, Project at [Grab](#) Tech Bootcamp [[doc](#)][[source](#)] 2025

- Building a recommendation system for traveling based on textual prompts
- Tools used: LangChain, Hugging Face Transformers, MongoDB

Crowd Counting, Course project [[doc](#)][[source](#)] 2023

- Estimating the number of people or objects in a given scene or image
- Tools used: Deep Learning, Unbalanced Optimal Transport, PyTorch, NumPy, Streamlit

SCHOLARSHIP

Scientific Research Fund 2024 - UIT

- A university-sponsored fund supporting outstanding scientific research

LANGUAGES

Vietnamese Mother tongue

English TOEIC 730
